Suggestions to Reynolds July 11, 1929

1) Mental health of the Modern Young Woman - an article to be based on material gathered at the Colleges. Dr. Martin's letter, which she gives me permission to use as I think wise, to be base. Barnard & Smith doctors particularly to be consulted May be made a seven-college article though it should be as general as possible.

2) Woman at the Bar. Study of the amount of drinking now going on. Mrs. Sabin says that she will turn any material that she has, in my direction.

3) What we really Think about Prohibition - analysis of the varieties of opinions and on what they are based - not a mere question of wets and drys - opinions to be quoted like thso in letter of Jennie Recker of July 2 - very good letter:

1) People who never see it
2) People who see it every day
3) People who know both classes and study the authentic reports, twisting them for or against
4) The 'personal liberty' crowd - largely temperate or even abstainers
5) The man with the eye on the political weather gauge
6) The man who profits by manufacture & trade
7) The man who profits through enforcement, either by appointment or with the law
