

December 6, 1932

Dear Miss Giles:

I am sending up Number Five, which you will see from Mr. Burton's correspondence several months ago they wanted to get the Westinghouse into the scheme. Mr. Berlin suggested you will remember that something on educational work going on in industry should be included. Westinghouse has as well developed system as any and so many inspiring figures that I have made that the theme. I think I explained all this in the letter to Mr. Burton of which I spoke to you this morning - the letter in answer to his telephone talk with me.

I am putting in as a suggestion to the Art Department a photograph of the Westinghouse Bridge which is really stunning. I thought they might use it in their heading. If they think they would like a photograph of the boy on the Club folder - a really fine figure of a boy - they can get it direct from the Advertising Department of the concern in East Pittsburgh, as well as any other matter that they want.

Hope everything is going well with you.

Publicly

Cordially
