October 20th, 1911.

Miss Ida M. Tarbell,
 American Magazine,
 New York City.

My dear Miss Tarbell:-

Enclosed are the articles of incorporation of the North Yakima New York Orchard Company. The plan as outlined by Mr. Ralph Williamson after his return from conference with Secretary Fisher and Director Newell at Washington, D. C. is as follows:

X
 Each investor is to deed his land to the company and take one share of stock for each acre of land. After the water right is paid for in full, you may surrender your stock to the company and receive your identical tract of land back again by deed from the company.

The company will hold not more than one hundred sixty (160) acres. The Board of Directors will consist of five members, two of whom will be residents of Washington and at least one of whom must reside at North Yakima. Two of the incorporators of the company will be residents of North Yakima. The company itself will be a Washington corporation and will make application for water for the entire one hundred sixty (160) acres and each shareholder will be assessed for his or her portion of the payment for the water right each year until all the charges of the government are met. I will be glad to have you submit the matter to director Newell as I am anxious for you to be able to continue your investment with a clear sense of right.

X
 As soon as you are satisfied in the matter please call at the office of Mr. F. B. Sanford, 165 Broadway, N. Y. City and sign the papers which will be in his possession until about the middle of next week.

Sincerely yours,

Charles H. Henry
