My dear Mr. Horne:

The New York Times of this morning published a dignified speech, written by the President of the N.Y. State Democratic Committee, who is chairman of the campaign committee of Mr. Wheeler, progressive candidate. I read between the lines in Mr. Roosevelt's column, "If I were to vote for a renegade, I would vote for a turncoat," and a turncoat I am.

Believe me I was never more convinced in my life of the necessity of continuing social, political, and economic reforms. This democracy is li-

Aren't you the Line. I am not a renegade. I believe in the prosperity of this democracy if it be for the poor, the friend of the laboring man. I believe in the New Deal.

The Republican is the Progressive. Indeed, I believe in the Republican party if it be for the people.
One thing is clear: the idea of providing a social, educational, and economic platform for women is at the heart of this plan. But what are the specific steps to make this happen? How can we ensure that women are not only part of the process but also become active participants in their own development and empowerment?

It is very much in the nature of the atmosphere in which we live and act that we develop certain qualities and characteristics.

In our daily lives, we interact with people from all walks of life, and these interactions shape our perspectives and values. The way we interact with others is a reflection of our personal and cultural backgrounds.

Understanding and respecting the differences among people is crucial in building harmonious relationships. By doing so, we can foster a sense of unity and cooperation, which is essential for the well-being of our society.
