The messenger is taking to you two volumes containing photographs of the Industrial Museum, American Steel & Wire Company, Worcester, Mass. Also the first two chapters of your manuscript. Also a typewritten manuscript, apparently an interview with John W. Gates, prepared for the "Manufacturers Record" November 29, 1906, having reference to the Southern Iron and Steel Industry and written by Albert Phenix, loaned by Mr. George C. Scott.

Very truly yours,
