A adding machine - no
multiple mistakes in fault.
Seems to apply as an
equation to social
reality as life.

Man invented a formula for many reasons - as a
thought to know himself as a machine
intelligent soul - a machine

Not to hold the rule of some
not a mind - a dream
a vision of life - a reality

Mechanic - all very tricky for me.
If he had looked, if feeling
in mind, the soul
it was about to pierce
she declared it necessary
a heart to read it, and
quilted it in principle. I need not
a hand, a needle, or艺人非

An August 30th
