Many forms of race are on farms and the platform card
are absorbed. The total demand
over 2½ million are in demand.
Since a two platform dog
lettered for these - millions are
over a half million are
in pyramids. I am supposed
not to need be. probably be
with a later color. However
the millions and dozens made are in them.

millions of
148, 245 pounds in cotton mills

In the cotton mills, the work is divided amongst the
employees. Half of the workers are male, the other half
are female. The male workers are responsible for the
production of the raw cotton, while the female workers
are responsible for spinning the cotton into thread.

Some employees work in teams, while others work
alone. The work is physically demanding, and workers
must be able to lift heavy loads.

Clothing Industry - P. 3.24, Item 11
Indeed the tools are moving from the man to the machine. More and more farm work is done by machinery. The new generation is not as skilled as the old. 

One year ago, we were one of the last to sell our crops. This year, our crops will be sold shortly after harvest. At the time, we had only 24.7% of the year's production. This year, we will have 24.5% of the production. By the time next year is halfway through, we will have 50% of the crop.
