

Indignity

Old Spirit:

Mac says, "All we need is leadership. Men will follow anywhere if you have a well-defined purpose. They understand very well, even today, that each depends on the other. If the pattern is of ~~black~~ ^{alloy} the casting will be of ~~black~~ ^{alloy}. It was to Marion, Ohio that the shipping was made, according to Pat Kennedy. He says each department delivered his work on the second. They reminiscence a bit. They remember a time when in order to complete a job they had to have two little bearing^s from down East. They were supposed to have been there on Saturday, but they did not come. They had been sent by mail - special delivery. The man in charge of the job went to the post office, had a special order to examine packages, and went over 2500. I believe he did not find them. The interesting thing is that he examined 2500. That is the way we work, he said.

"That is the way we have to work now," broke in one of the men, ^{cynically} "This is a buyer's market. They have us on the run."

All these big concerns are corporate up against the necessity of taking any job, little or big, although to do it it may cost them much more than they get. They cannot lose a customer by ~~their~~ refusing.

Pat Kennedy told me that 80% of the people at the Westinghouse have been there over fifteen years. ~~XXXXXXXXXX~~
