

Safety:

They have a new angle at Armco on safety. That is, it is an integral part of training. "A well-trained workman," says Murray, "is a safe workman. An accident is a mistake. It is necessary in industry to train not to make mistakes." That is probably in industry as no where else - safety is the outcome of training.

Relation of order to safety as well as to economy. Verity's practice as seen both in the plant and in his dairy.
