Mr. William Leiserson
Antioch College
Yellow Springs, Ohio

Dear Mr. Leiserson:

I hope you have not quite forgotten my name. I remember so well many years ago when I first met you when you were doing so good a job in the Unemployment Bureau of Wisconsin. And while I have never kept track of your work as I should like to have done I have never lost interest in it.

I am coming now for a bit of information. Mr. Frank Goodell of the Taylor Society mentioned to me yesterday your handling of a case of technicoeological unemployment at the time that you were acting as impartial chairman in the garment trade here in New York.

Mr. Goodell said that it was the first time his attention had been called to the subject and that he was impressed by what you did. Now I should like very much to get hold of this case for a little popular article that I have undertaken on this subject. Could you refer me to any record of it? If not, could you tell me about it? And have you written anything on the subject directly? I should be very glad to know.

I have an idea that you are doing a most interesting and valuable job at Antioch. I wish I might get out some of these days and see how things are going there, but I seem to have been tied very closely to my work *-Lark* during the last year. At all events you have my very best wishes.

Very sincerely
