

Alonzo Victor Lewis

SCULPTOR * PAINTER

Dear Mr. Bonney:

This head of Lincoln which is eleven feet high, is perhaps the largest head of the great Emancipator ever sculptured. The neck and shoulders will soon be added to the face, and the head completed in the back.

When this is done the bust will stand nearly twenty feet high.

About 40,000 lbs of clay was used in the making of this statue, and when fully completed, over five years of work. Its first public showing at the Lincoln day banquet of the King County Young men's Republican Club, brought waves of cheers and applause from the hearts and throats of sixteen hundred persons.

Kindest wishes to you
As ever
