

February 5, 1936

Dear Will;

Don't you want to make a little investigation for me? Look over this T V A report. It says that two hundred miles of rural electric line had been built at the close of the fiscal year. I would like to know what our electric company, the one that serves us, how many miles of rural electrification it has built and what its capital is. If they make any public report and I suppose Connecticut laws require utilities to do that I wish you would ask for the latest. I don't know how I will use this but I think I might have a chance.
