

3 SUTTON PLACE

July 26, 1932.

Dear Miss Tarbell:

In a letter from Miss Morgan, written from Paris, she asks me to write to each one of the judges for the A.W.A. Medal Award for 1932, suggesting that they recommend their own respective candidates. If therefore you have any recommendations to send in at this time, will you address them to this office and I will follow the usual procedure of filing the originals here and making copies for the consideration of the various members of the jury.

Dr. Florence Sabin has already sent in four recommendations which all come under her own division--"Science and Law", as follows:

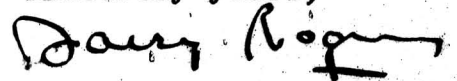

Dr. Louise Pearce of the Rockefeller Institute
Dr. Marie Reimer, Prof. of Chemistry at Barnard
College of Columbia University
Dr. Anna W. Williams, Bacteriologist in the Bureau
of Laboratories of the New York
City Dept. of Health

and in Law--Miss Emilie M. Bullowa.

With reference to the three recommendations sent you on June 22nd, I neglected to state that Miss Lillian Wald would come under Education and Public Affairs--Miss Marbury's division, and Miss Amelia Earhart under General Interest, which is Mrs. Charles Sabin's.

As I expect to be here for several weeks before going on a holiday, I would be very glad to receive any recommendations if you care to make them.

Very sincerely yours,

Secretary to Miss Morgan

Miss Ida Tarbell,
120 E. 19th St.,
New York City.
