Dear Miss Tarbell---

I am sending on to you the original copy of Article Four, which has a number of notes made along the margin, some of them taken up in Mr Berlin's comment, a copy of which I sent you some time ago.

If you feel that you can touch on one of the Food Industries, and what these are doing in the way of unemployment insurance etc etc. I believe it would widen the interest in the article and the series very much.

You probably know about the Recky Mountain Coal Company---- but I recall the article in the New York Times--- either last year or the year before--- and friends of mine who are large stockholders in the company, (their father was one of the two original owners) have assured me of the sound working results which this woman president has brought about at a time when the Coal business all over the world is tottering on the brink of ruin.

About illustrations for this fourth article Will you do as you have been doing and ask Mr Swope and the General Electric officials to send us some photographs. ?

If we can get after these right away it will help the art department very materially.

Very sincerely----

Dorothy Sikes
