didn't miss
much about
them

about the night's first
flight I call for every-
a ambush at two
whooping up. that fold
night's all scoops.
Pops are as imagined
when, fighting their
merrily of about in
it that the world's
first news of that little
flight was in a
monthly magazine,
& 55 asked as far that road.

(I am very conscious of something a 'stranger would not^{missing} get

at all --it seems to me -- from this account: that is the degree
~~XXX~~ S.S. cared for the soundness, the truthfulness of the maga.
 He would say anything if spurred to it, and a lot of that sloshed
 over into ~~the~~ his editorship-- and he counted ,I should guess as u
 much as for anything else in the relation, on J.S. P. making sure,
 sure, to keep all soundly superior to ordinary sensationalism, ~~xx~~
 absolutely trustworth as to facts, that being unvaryingly his ideal
 in the abstract, whatever happened when he got hot on the trail of
 a grand stroy. The marvellous quality above all in his powers, as
 I in my outside littleness,saw it , was the way he got people
 together to balance his excitements. You have dwelt somewhere on
 the freedom of speech in the office. Yes, and that was not so
 characteristic of S.S. when he was in the open with no end to achis
 but when he had he attached people who added organs to the outfit
 he brought into the world, knowing what he lacked by unworded in
 stinct. When Howard Pyle tried to make hay with agreements -- h
 then was when S.S. saw what a blunder he had made in going for
 that bigname, and never paid anymore attention to him.
 I know you are not writing a book about S.S. ~~and~~ , but a little o
 of this is imperative ~~k~~ not to avoid a false impression.

I think it would add to the essential truth
 to say J.S.P. ~~is~~ was unmistakably the most intellectual as well
 as the most intellectually trained person in the office.

That has nothing to do with special gifts and talents: but he
 is really a strong and wide ranging intellect ;-- to be sure
 you may not see that word as meaning what it does to me.

I speak of intellect as a matter of intellectual vision,
 and into
 far, wide and deep vision, outlook over the range of existence
 was what made La Farge the most intellectual man I ever knew.

222 P.S. I know how he may have spoken in the office. When you interpret him in a Book, that is another thing. But I don't have to argue for a thing that has engaged such minds as has style in dealing with it.

I see lately one sound word lightly given ~~in~~ by I.M. Patterson as to the damned crime of setting children in school to telling what, say, Wordsworth means about Peter Bell in his own words!

7 Don't say him
garden with a
misinterpretation
