

1/3 Politics Chandler.

e.g. begins with letter on a review of Norman Thomas's
numbers on democracy. I could go along with him
up to point - it says that - we must take in
production of necessities of life - that means
a democracy that runs functions efficiently -
insist on keeping jobs - etc.

He reads that W. T. says & it really is
that B.B. is very illiberal during political
influence - Gel - this view

then, def's article in public opinion -
one of his dogmatic crisp phrase-making
articles - wiping out political theory and on
to industry - J. Canyon & goes to expand
his idea that B. & P. must run parallel
distinct function of activity - neither must
interfere - manufacturing attempt a control over
P.H. preserves the liberty of individual -
But can for his economic needs -

Politics can so dominate that men
their daily upped them act & men conclude
that economic life could re-establish itself

Don't mind that the system calls
itself of the fundamental fall economic
life are shared & per - Ref of Chandler

came to deal with G. S. Our Communism will make
 you suspicious. No I said - I don't mind that you
 would agree is - when it comes to feeding
 & clothing people all systems must work

 named technicians - craftsmen (3) make
 distribute - where you call yourself you
 must so handle your job - the ⁽⁸⁾ must
 so work together that you can give people
 what they want - what other nations give
 them - no matter what you call
 yourself politically if you do this - if
 you get politics' destiny clearly to do
 this your system will change -
 I fear capitalism because it has been
 seen for hundreds of years in that form
 never to let it go or evolving - correcting
 abuses - if not checked - the communists
 on the whole would be aspired - one of these
 accumulated - but on deficit - not to
 involve correct control capitalism to do

the economic job people require.
