BY APPOINTMENT ONLY

January 9, 1939.

Ida M. Tarbell,
120 East 19th Street,
New York City.

Dear Miss Tarbell,

We were informed Saturday evening at the N.Y. Women's Medical Association Meeting at the Town Hall of the program "Women at Work" and were asked to cooperate. I can give you the entire information on Artificial Insemination and Test Tube Babies, including some candid camera shots.

If you would prefer not to lose time with an interview and send me a list of questions which you may think pertinent to the subject, and which may be of interest to the Women at Work, I will answer them in full. If you prefer, I could send you a short resume of the work done in this field, as it is one principally created and carried on by women physicians and surgeons.

Sincerely,

Frances I. Seymour
