

Sept 28, '33.
Dear Mr. G. I am very glad and happy to see
to get your letter, and I'd be proud if I could
answer it intelligently. But for the
most part - languages, associations and
things - are all too abstract. You've taken great
interest in getting any light I could on
this government's ways and achievement
with the general population. I could not
for a time find anything convincing
about the slump or free speech, but
when I did it pointed out a
suppression as such. (People
who used to be afraid to state
their views here are now, but under
your name is the trouble I think this
will get this. The surface a traveler
seems well ordered, comfortably
away for these times & with small
signs of bad poverty - no hint of the
habits common as dirt in Europe
at the top of all poverty & prosperity
fifty and a years ago. I hear much
my opportunities for employment. (When
the keeping of employment. (When
poverty - I was everywhere & there had
an 34 the big shops here were
empty - as they have not been

This year in many months. I have
the skating - and before breakfast -
been entertaining to seeing many
bands of small, often very small
Giacini (both sexes - but not together
unless they are at Giacini) in a black
and white uniform marching
down the street when at church schools
take out in singing, sometimes with
bands, players taken from the ranks
as it were. They march wonderfully
well, and of course show they like it
better than smaller with importance
I should not think they feared a
big proportion of the children of Yakima
I am told it is all voluntary, and the
state in back the chances of any one
in government employ - including city
officials - who did not put his offspring
under this discipline.
Perhaps you have heard via Kathy via
S. P. that I am flourishing. That perhaps
under the terms of a great name you
have an authority on the subject
of my health makes excellent sense,
I can
complain my doing like in '31 and
all accurately in a reverse way

2 I am ~~exactly~~ more than I
what I was then. This is thanks
primarily to my arm and ankle
that sent me to Boston - thanks to
Beth Miller. It is in the pattern
of my life that God has covered
the me as usually diagnosed as
bad. God's did that. He says
that old Dr. Rose who has asked
me - mainly the treatment is here.
Did I say something of a pain you
experience - you don't know what
much you are afraid. My best
of getting out of doors is impossible
for my ~~disgracefully~~ managed
pains. My favorite feast is the
Grass. Michael Angel when I am out
walking yet. I climb up and down
all hours, including a lot of
jumps before breakfast. It is a heaven
by walk. My favorite being near the
bridge that is near the greenery that
at the side. Tell Mrs. Ella that she is
the one who ought to be with me
in the early ~~at~~ church. It is not
that my ankle is anything to say
about, only its jumbles and
troubles about.

and now need pay attention
to in the last ten days. I've begun
attaining when fresh my walking
step and stride. & that puts much
an unusual strain on the muscles
of my calf that they get sore and
give me a new kick.
I expect to sail for Barcelona on week
from today with a pleasant companion
who expects to stay with me till I am
ready to sail for America. - perhaps
a year from now - nearly that if
I live on - come back at all. And
a gain in health at my age makes
one think of the flaking of the candle
that's going out. God knows - aware
I suppose it had felt all - I know that
influenza will not cut down my force
much more, anyhow up to with
brain that includes everyone I am
as well - better off here than there
money mine; if all slides back down
hill into a gulf there is no little that
father's narrowness! And you see I give
Olivier a good deal of credit for
my health. I expect to go South in June
very soon. Address: 4800 Looker Lane, 24 Calle
de la Madria indefinitely. Don't
#4 you should so address me.
