

Suggestion - Notes

An interesting example of exploitation of the prejudices against the Standard Oil Company comes in this note in regard to Mrs. O'Day. It is far fetched and hard to imagine. It is like the campaign against the Gary schools of Gary, Indiana, the connection there with the Rockefeller name. How are you going to secure decent people in politics when they are held responsible for that with which they have no connection whatever, but how it does illustrate the dictum - "From the children shall be visited the sins of their Fathers, even to the third and fourth generation."
