Dear Miss Tarbell:-

One of my friends, a patent and trademark attorney, has advised me to copyright the ambrotype of Lincoln. I have no knowledge of copyright law, that being a specialty, and I was wondering if in your research you have come across any copyrighted ambrotype or daguerreotype of Lincoln and whether or not it is worth while so to do.

I would appreciate any information that you may have and care to give me along this point.

Very sincerely yours,

An hour of art
