Los Angeles, Cal. July 31. 1929

Dear Miss Tarbell:-

Read your article in Liberty, "Is Prohibition Forcing Civil War? and consider it the most forceful article that I have ever read on any subject and if we could get together and you write my story, The "SCIENTIFIC AGE" Dawning, we could revolutionize the world. Wont you help me?

The theory is that jealousy and greed are the causes of all crime and are symptoms of germs in the blood, that can be eradicated by science.

I wrote the National Commission on Law Observance and Enforcement, that when they go deep enough into the problems, they will find that typhoid, smallpox, bubonic plague, alcoholism, narcotics, jealousy, greed and leprosy, cannot be eliminated by law enforcement, without the aid of science. That all of these are caused by germs and requires similar treatments, then they will begin to do some thing really worth while.

Dr. R. M. Hunt, Ferris, Texas, has discovered a "TRUTH SERUM" that absolutely compels the worst criminals to tell the truth, when injected into the blood. Make this effect permanent, and it might solve the problem, as a man who could not lie would not rob or murder his fellow man.

His discovery makes it possible to take a long step towards real civilization. If put in use it would do away with trials by witnesses and juries, eliminating perjury, and injustice. This would have a miraculous effect on law observance. The truth and stern justice, within a few minutes, would deter the hardest criminals.

Columbia University, has perfected a serum that makes a man very courageous. Why not perfect a serum that will make all men very conscientious?

I suggested that if any of the Commissioners lacked the necessary courage to present their findings to President Hoover, in the right light, that they have their courage cells, recharged at the Columbia University Laboratories.

He would find a way to put Dr. Hunts' Truth Serum, in use, and would get the right laboratories and scientists at work and they would perfect a serum to make all men very conscientious.

Our jails and penitentiaries would be turned into, laboratories and clinics. The "SCIENTIFIC AGE" would become a reality. All religions would be blended into one. There would be only one army, and that would be scientific, and they would be engaged in courteous helpfulness to every one and in fighting germs and insect pests that threaten to destroy us.

They would "CONQUER THE EARTH" making it clean and beautiful, a fit place for real civilized people to study, play and work in.

Mr. Lowenthal, wrote me that my letter would be given due consideration, but I need very badly to get some thing doing and if you will write the story etc I believe we could begin to be understood and bring a slight pressure on the commissioners, and maby they would really recommend same and get some thing moving with such a force that Congress would be swept off their bases and would put truth serum in use as a starter etc.

I believe magazine articles, a book and maby a movie or a talkie, would do the work and put it over.

Do wish I could see you and talk to you. I am so lonesome with no one really to talk to about my life dreams and plans. Wont you help me? Come out to Los Angeles and less get busy.

I made a movie entitled "THE GERM" in 1923, at San Antonio Texas, but as I was very green, did not see the trusts before filming and ofcourse could do nothing with it.

I am having quite a battle with the demon "GREED" in handling my invention. If I could get a small part of what I should have I would be in a position to do the work of finding the real remedy myself. Enclose photo of bus, the inventor is on the left, with foot on running board.

Trusting you will be interested and in a position to take up the work, I am,

Sincerely yours,
