My dear Miss Tarbell:

If you'll pardon this doleful looking war tiem hotel paper I want to write you without further delay and to ask, if you are "for" General Wood, whether you will not send me a statement of a few lines saying why you are for him?

The Wood League publicity group, of which I am one, wish to secure from those whose opinions count with our people, their reasons for favoring the General, and to give these to the press.

I need not say how far and importantly your word of indorsement will go towards influencing sentiment for him among those likely to be distracted by the trumpeting and the log rolling of the politiciãans--not to mention the emotional waves loosed at Washington-- and I hope you will see your way clear to help, if, like us, you feel that Leonard Wood is the man we need in the White House.

With regards, believe me,

Sincerely yours

Caspar Whitney
