

PA 22000
Dear Lady;

Today finishing Adams Epic of America I saw something that reminded me of a word I mean to say anent your last batch of copy seen by me and that I think I forgot to put in; not important, still I'd rather you were sound one little place where you were wrong with the majority: "Muckraking" it is certainly all right to use as it has come to be used, but when you refer it to Bunyan it is better to look as if you knew how Bunyan used it; which was differently from the usual supposition current. I have not a Pilgrim's Progress here (kept as all my favorite books are sooner or later by a borrowing thief). I can't tell you where the word comes in, but it is a name for a sinner, not for any kind of critic of sin, hypocritical or otherwise.

I am confident, but I would not want you to

interpret Bunyan on that description, too vague.

I hope and pray that you are coming up these days.

I wish you or some one had told me if J.S.P. was a
your dinner. But I fancy I would have heard if he was not

I am getting on better this last week than
than in more than a year. Another case of the pattern in
the carpet. I have always saved myself by some curious
discovery that no doctor had anything to do with.
Which is not saying there would have been anything to save
save if I had not had some good doctors.

With so much warm feeling of varied
names,

Viola R--
