Faculty Ruling Prohibits Campus Honorary Fraternities

College Hits at Activities Recognition of Students.

"No organizations, members of which are determined on a basis of participation in extra-curricular activities, shall be permitted on the Allegheny Campus," was the report adopted by the Allegheny faculty at its last meeting in an attempt to curb extensive participation in extra-curricular activities by the students.

Although no particular organizations were mentioned, the college administration reports that it was directed to eliminate Omicron Delta Kappa, honorary men's activities fraternity, and Omicron Epsilon Delta, honorary senior girls' activities fraternity. Under the ruling, the Cwens, honorary activities organization of sophomore girls, would also be affected, but special faculty investigation of the initiation requirements will be held and a decision will be made at the next faculty meeting within the next month.

The new ruling was a section of the report of the faculty committee authorized to investigate extra-curricular activities, which was adopted by the faculty as a whole. The committee is composed of Prof. Morton J. Luvaas, director of music; Prof. Hurst R. Anderson, coach of debate and speech instructor; Prof. Henry Boettcher, of the drama department; H. Paul Way, head of the department of physical education; J. Richie Shultz, dean of men; and Evelyn Miller, dean of women.

The new ruling will not go into effect until September.

Further regulations were adopted regarding social functions. Under the new ruling, college and fraternity chapter dances will be strictly limited to Saturday nights. Radio parties may be held on the second and fourth Fridays of the month and on Saturday nights when a chapter party is not scheduled. Previous to this no regulations regarding the dates for dances had been made.

Meetings of departmental clubs have also been restricted. Their meetings are to be held on either the first or third Friday of the month. This ruling will affect all honorary fraternities such as Phi Beta Kappa, Kappa Phi Kappa, Phi Beta Phi, and Kappa Delta Epsilon. Clubs such as the history and political science club, Thoburn club, German club, outing club, classical club, and the Philo-Franklin Union will also be forced to comply with the restrictions.

These restrictions on dances and departmental clubs are intended to free week nights of activities to stimulate studying on the part of students. In adopting these resolutions, the faculty maintains that it is not an attempt to eliminate extra-curricular activities from the campus but to curb the tendency on the part of many students to participate in as many outside activities as possible to facilitate acceptance into an organization which requires excellence along these lines as a prerequisite to invitation for membership.

Omicron Delta Kappa was established at Allegheny in 1929 to honor those men who had shown unusual ability in extra-curricular activities. Its members are chosen on scholarship, character and leadership in campus activities. Recently the organization undertook an investigation of student government in an attempt to offer suggestions for improvement.

Richard Horn is president and Arthur Vangeli is secretary.

Contest Deadline Cited By Photography Club

The second competitive contest for the members of the Photography Club will draw to a conclusion at noon, February 17. Submitted prints are to be viewed by members of the club and judges during the regular meeting in Wilcox Hall Monday night. Following the awards, they will be placed on exhibition in the library.

Contestants are reminded that there is no limit on the number of prints that may be submitted but all of them must be mounted when given to the committee. All of the members of the Photography Club are eligible contestants.

Playshop To Present Second Production "Noah" On March 14

The Allegheny Players will present "Noah", by Andre Obey, on March 14, 16 and 17, at the Playshop as their second production of the season.

"Noah" is a delightful fantasy, produced first in France where it was written by Obey, a French dramatist. The cast is composed of Biblical characters and in the plot dramatizes the story of Noah's ordeal revealed in the manner of a fairy tale.

The play was adapted from the French by Arthur Wilmurt and was produced for the first time in America at the Longacre Theatre in New York last year. New York critics declared this to be a charmingly fresh and original play. It has only been released to amateur rights in the last few weeks.

As yet the cast has not been completed, but tryouts have been held for the past two weeks, and it is expected that the complete cast will be announced in the next issue of *The Campus*. "Noah" will be under the direction of Mr. Henry Boettcher. The settings and costumes, novel features in themselves, will be under the direction of Mr. John Hulburt.

Honor Members Of Allegheny Players Released Recently

The 1935-36 list of the Allegheny Players group was recently released by Miss Alice H. Spalding, director of the Playshop.

The players' group includes those students who in the past have done efficient work in acting or producing plays given before the public and who are still interested in dramatics work. The members of this group remain in readiness for future service at the Playshop at any time.

This list, while complete at the present time, will be augmented before the close of the semester. The names of new participants in Playshop activities who demonstrate ability will be added to the list from time to time.

The group at present is as follows: Joseph Macedo, Philip Jacobus, Donald Murray, Joseph Phillipbar, Phyllis Freeland, Helen Hahn, Helena Mumaw, Ben Raskin, Edward Carney, William DunLany, Dorothea Ely, Marian McCordell, Esther Goodwin, Helen Edmundson, John Jones, Laura Beebe, Eugene Wasson, Gardiner Youtz, Wallace Black, Dale Stoops, Gertrude Fink, Sara Henry, Martha Keefe, Alexandra Charnecki, Elizabeth Gottschall, Jeanette Rose, Valerie Fullerton, Betsy Robinson, Kenneth Powell, Byer Africa, Charles Barkley, Stuart Smith, Myra June Bankir, Miriam Parsons, Jack Barkley, Alfred Wellons, John Dorworth, Dale Beatty, Romayne Lawrie, Amy Bishop, Lois Slocum, Cobb Diaz, Seymour Smith, and Frank Bailey.

"War" To Be Subject Of Intercollegiate Forum Next Week

An Intercollegiate Forum will be held in the Playshop Theatre on Feb. 19 for the purpose of discussing "War". The group will be composed of representatives of Ohio Wesleyan, Oberlin, College of Wooster, and Allegheny.

The subject will be introduced by Arthur Vangeli as Allegheny's representative. Proceeding from this, a Wooster representative will present the extreme "preparedness" point of view which will be followed by the contrasting stand taken by the extreme "pacifists" as explained by an Oberlin representative. Ohio Wesleyan will attempt to present a compromise measure by urging preparedness for defense only.

Following the general speeches, each team will have an opportunity to present other remarks with the view of strengthening their case in the light of the other plans set forth.

Dr. Paul Giddens will preside as chairman and make observations of the points brought out.

Thirteen Students Enroll In Allegheny For New Semester

Thirteen new students were entered on the roll at Allegheny at semesters. Two transfers, B. Miller and W. Williams, claimed Penn State as their alma mater. Mildred Custead transferred from Hiram College, Hiram, Ohio, and John Wheatley from Pitt Center in Erie.

New freshmen entering are Kenneth Janson, Syracuse, N. Y.; Charles Cares, Cleveland Heights, O.; William Cutler, Dormont, Pa.; Marian Ramsey, New Castle, Pa.; and Amelia Gracy, Franklin, Pa.

The remaining five come from Meadville. They are Gordon Barrett, Mary Hutzley, William Keilbough and Alverda Gerlach.

High school scholarships were awarded to Marian Ramsey and Amelia Gracy while John Wheatley is the recipient of a special scholarship.

Allegheny Was Host Of Visiting Women Debaters Last Week

Cochran Hall lounge was the scene of a non-decision debate between Betty Elliott and Aileen Rockenbach of Allegheny and Mary Virginia Brown and Dora Diamond of Pennsylvania College for Women on Friday afternoon, February 7.

The subject of the debate was: "Resolved that the United States Congress should have the power to override by a two-thirds majority decisions of the Supreme Court declaring acts of Congress unconstitutional." The women of Allegheny supported the affirmative, and Miss Brown and Miss Diamond the negative.

Basing their case on only one point, the affirmative argued that a new amending process is needed for the United States; that the present one is too cumbersome and expensive; and that it prevents necessary social legislation and makes it impossible for the national government to legislate effectively on questions that individual states can not deal with.

Miss Rockenbach of the affirmative stated that by proposed new amending process they could achieve all the above points and do away with the evils of the present system.

Miss Brown and Miss Diamond of the negative refuted the affirmative's one point by claiming that there was no historical justification for the proposed change in the amending process, and that social progress can be achieved under our present system. They advocated a constitutional amendment in the regular manner providing for certain social changes.

Such an amendment could not be passed because a minority block of states could and would block such an amendment under our present system, according to Miss Elliott in rebuttal for Allegheny.

Miss Brown and Miss Diamond continued on their debating trip to Slippery Rock, where they debated on Saturday. Marian Henry presided at the debate here Friday.

"La Maternelle" To Be Presented On Feb. 24

The third of a series of French movies this year, *La Maternelle*, will be shown at the Academy on Monday, February 24, at 4:30 p. m.

This picture has been reputed as a very interesting one with an excellent rating for exceptional photography and filming. It also has sub-titles in English so it should prove very entertaining to everyone irrespective of their knowledge of French. The production will be sponsored by the college and Phi Sigma Iota. Admission charges will be twenty-five cents.

Three Students Added To Lit Magazine Staff

Three students have been added to the Literary Magazine staff, according to Dale Beatty, editor.

Aileen Rockenbach and Betty Elliott have been placed on the editorial staff, while Miriam Parsons has been made art editor.

Beatty also announced that the deadline for unsolicited material for the next issue will be February 26.

Chemistry Department Head Dies After Long Illness

Campus Groups To Be Taxed For Social Functions

The Divisional Chief, Department of Revenue, Stamp and Amusement Taxes, wishes to inform the readers of this paper that all classes, societies, and organizations (including Fraternities and Sororities) affiliated with Colleges and Universities MUST secure Permits from the Department, for each type, manner, or form of amusement sponsored by them for which an admission charge is made or an assessment required for the privilege of attending same. These Permits may be applied for on regular forms supplied by the Department for that purpose.

In addition to Permits the producers of an amusement, for which there is a charge or an assessment, MUST also collect taxes at the rate of 1c for every 25c or fraction thereof on the regular established price. These taxes are to be remitted to the Department together with a Report of Amusement Tax Form, also supplied by the Department, after the amusement is held.

Exemptions from the payment of taxes will be granted only if the producer applies for an Exemption, on a regular form, at least ten (10) days before holding the amusement and if the net proceeds, after payment of reasonable expenses, are to be given directly to the College or University fund. There are, however, absolutely no exemptions whatsoever as far as Permits are concerned.

Failure to comply with these requirements is a misdemeanor under the Amusement Tax Act (Act 183) and the producer shall, upon conviction thereof, be sentenced to pay a fine of not less than One Hundred (\$100) Dollars nor more than Three Hundred (\$300) Dollars and costs of prosecution, or to undergo imprisonment for not more than 6 months, or both, in the discretion of the Court.

Any forms or information will be gladly given by communicating with the Department of Revenue, 409 Plaza Building, Pittsburgh, Pa.

Ufford Plans Further Vocal Tone Study

Under Prof. Charles W. Ufford, plans are being made for further development of a device to record quality of vocal tones.

This was to be a supplement to the audioscope, an instrument to record voice pitch, which has been successfully used by the Allegheny Singers in preliminary practice. It is not known definitely as yet that the new development will require the installation of another instrument for the sole purpose of recording tonal qualities. It is possible that some changes can be made by the present machine to record both pitch and tone on one instrument.

The audioscope consists of a microphone, an amplifier, and a cathode ray oscilloscope. In operation the voice is transmitted to the microphone and through the amplifier it passed into the oscilloscope, where the voice is transmitted to the microphone and through the amplifier it passes into the oscilloscope, where the voice is projected onto a screen which is sensitized to electrons. On the screen the voice registers as a line which measures the pitch of the subject's voice. If the wave remains stationary, the voice is on an accurate pitch. When it fluctuates to the left, the voice is sharp, and a registration to the right indicates the voice to be flat.

Plans for the new addition are the result of recent investigation of science into this field, and as yet full details have not been completed. Work on the new project will probably be started within the next month.

With the new development, it is expected that accurate tonal qualities of groups will be recorded and will be a valuable aid to the Allegheny Singers in improving the general tone of the entire group.

Dr. R. E. Lee, 28 Years Head of Chemistry Here, Succumbs January 28.

On Tuesday afternoon, Jan. 28, death following a protracted illness claimed Dr. Richard Edwin Lee, head of the Allegheny department of chemistry since 1907, in the fifty-ninth year of his life.

Students, faculty, and townsfolk who knew Dr. Lee as a scientist, author, lecturer, athlete, and neighbor mourned the passing of a distinguished personality in the simple dignity of memorial services held Friday afternoon, Jan. 31, in the college chapel.

As the director of the freshman integration course in science under the new curriculum, Dr. Lee's engaging lecture style and forceful projection of fundamental concepts were widely known. His classes were intellectual storm-centers to heighten student interest in the scientific approach.

Dr. Lee's recently published book, *The Backgrounds and Foundations of Modern Science*, was used in conjunction with the science survey course here. It has already been adopted by other colleges because of its invaluable synoptic outlook on science.

Before a flower-banked bier in Ford Memorial Chapel last Friday afternoon, a host of sorrowing acquaintances, faculty colleagues garbed in cap and gown and students indebted for a new and advanced outlook on man and his universe gathered to render homage to the personality they all knew and revered.

In his appraisal of Dr. Lee, his life and work, President William P. Tolley said in tribute: "Professor Lee will be remembered by scientists as the director of a highly original freshman course and the author of *The Backgrounds and Foundations of Modern Science* . . .

"We shall remember him, however, not as a scientist but as a man. Students will speak of his shy, boyish smile, of his alert and brilliant mind, of his passion for intellectual honesty, of his demand for strict attention while lecturing, of his impulsive kindness and his fierce unwavering loyalty to all who came to be his friends. Children will remember the man who always stopped to talk to them with such deference and respect, and citizens in every walk of life will treasure the memory of their friendship with him . . ."

Born in Philadelphia Sept. 9, 1876, Dr. Lee received his formal education at Mount Union College. After acquiring his M.S. degree at Cornell University in 1901, he pursued graduate work at Harvard; here he obtained his A.M. degree in 1906. New York University conferred the degree of Sc.D. on him in 1910. Implementing his intensive research work in analytical and physical chemistry, Dr. Lee attended the California Institute of Technology at Pasadena in 1931.

As an effective lecturer on scientific topics, Dr. Lee's services were greatly in demand for Chautauqua circuits.

An esteemed member of numerous honorary and fraternal organizations, Dr. Lee was affiliated with the American Chemical Society, Royal Society of Arts, of London, American Public Health Association, Shrine, Phi Beta Kappa, Author's Club of London, Harvard Graduate Club, Rotary Club, Iroquois Club, Meadville Literary Union, Meadville Country Club and Sigma Alpha Epsilon social fraternity.

As a bacteriologist for the city of Meadville and a member of the City Planning Commission, Dr. Lee was extremely active in civic enterprise. For many years, he served as consulting chemist for the Hookless Fastener Company, National Bearing Metals Company, and the Venango Manufacturing Company.

Author of five text books, Dr. Lee's reputation as an educator and teacher was nation-wide. The book titles follow: *Experimental Chemistry*, published in 1908; *Outline of Qualitative Chemical Analysis*, 1910; *The Human Body, a Chemically Regulated Organism*, 1912; *A New System of Qualitative Chemical Analysis*, 1915; and *Man, the Universe Builder*, 1933.

As an ardent devotee of sport, Doc. Lee—as he was intimately known to his students—starred in football, basketball, and baseball during his attendance at Mount Union College. His superiority during this period culminated in several offers to play profes-

DR. R. E. LEE

"Professor Lee will be remembered by scientists as the director of a highly original freshman course and the author of 'The Backgrounds and Foundations of Modern Science' . . .

"We shall remember him, however, not as a scientist but as a man. Students will speak of his shy, boyish smile, of his alert and brilliant mind, of his passion for intellectual honesty, of his demand for strict attention while lecturing, of his impulsive kindness and his fierce unwavering loyalty to all who came to be his friends. Children will remember the man who always stopped to talk to them with such deference and respect, and citizens in every walk of life will treasure the memory of their friendship with him . . ."

Thus did President Tolley epitomize the splendid, vibrant personality of Richard Edwin Lee—scientist, author, lecturer, sportsman, and friend—whose death marks a grievous loss to Allegheny.

During the twenty-seven years of his association with Allegheny, Dr. Lee imparted a refreshing, zestful outlook to his classes. Consecrated to the attainment of scientific truth, unerring in his demand for intellectual honesty, Dr. Lee has broadened and crystallized the students' vista of the universe. Candid and forthright in his approach, Dr. Lee was a powerful intellectual stimulus, blasting accretions of student overbeliefs.

His admirable personality has already been incorporated into Allegheny tradition.

As a man of infinite accomplishments, Dr. Lee will be esteemed by all who knew him for his masterful scientific work, for his authorship of five chemistry text books, for his illuminating survey entitled "The Backgrounds and Foundations of Modern Science", for his sportsmanship and athletic skill, and, above all, for his intensely human qualities.

With his death, college and community have lost a vivid and expressive personality. Science has lost an incomparably brilliant and inquiring mind. Allegheny—imbued with the tenets and accomplishments of this great and gifted man—will ever treasure the memory of "Doc Lee, the Universe Builder."—S. Z.

REGISTRATION PROBLEM

Allegheny's curriculum has been modernized; Allegheny's social regulations have been modernized; Allegheny's dormitories have been modernized; but Allegheny's registration system remains a relic, handed down from the days of Timothy Alden, unsoiled by the modern touch of efficiency.

It should not be difficult to persuade administration officials that the present system is intolerably cumbersome. Let them look at the long line of students waiting for hours in order to register. Certainly the weary students need no persuasion.

The solution to the problem does not consist in allowing particular groups of students to register early. While this is quite satisfactory for the fortunate ones, it does nothing to relieve the general congestion or to benefit the majority of students.

Perhaps a plan might be worked out, following the example of certain larger universities, whereby each individual has an appointment to register. Such a system offers no added difficulty for the office staff; it is undoubtedly advantageous for the student body, for the time spent in registration would be a matter of minutes, not hours.

Whatever the new plan may be, let it by all means be an efficient one.—B. E.

ICY WALKS

During the past few weeks of "ice coated sidewalk" weather, we have wondered when something would be done to aid the students to maneuver to and from classes on their feet, instead of sliding halfway there in a horizontal position. Every walk on the campus has been in very bad shape for a week, with the walks in front of Arter Hall and Hulings Hall practically impassable.

With all the students working at odd jobs on the campus, is there any reason why some of N.Y.A. employees cannot either chop up the icy coats, or at least facilitate walking by sprinkling ashes or other materials on the walks? At least something can be done to relieve the danger of serious spills, even if spring is only six weeks away.

The accident to Ruth Whitmer, Sunday night, is an example of the dangers of leaving the walks untouched. Just because only one student has suffered serious injuries is no point in defense of not cleaning the walks. Others have had "close calls".

A "SQUARE DEAL"

In viewing the recent action of the faculty in respect to two of the honorary activities fraternities, Omicron Delta Kappa and Omicron Epsilon Delta, it appears that these organizations did not get a "square deal".

It is not the purpose of this editorial to uphold or to criticize ODK or OED; it is to point out certain facts which have arisen concerning the situation.

Membership in ODK and OED is based upon participation in extra-curricular activities. The detrimental effect upon the scholarship of "key-chasers" led the local group of American Association of University Professors to petition the Administration for a faculty committee to investigate the situation.

That the situation was harmful was recognized by ODK. In the January meeting of that organization a committee was appointed to draw up new eligibility rules for membership, the purpose being to eliminate the evils which have been pointed out above. Although the faculty committee had been appointed before Christmas vacation its existence was unknown to ODK until last week.

The existence of the ODK committee was known to several faculty members. No mention of this committee was made either in the faculty committee meetings nor in the general faculty meeting last week.

ODK and OED were given no chance to present their case. They were not consulted as to the proposed resolutions. The ODK committee was not considered.

The action of the faculty has all of the appearances of "rail-road" legislation, although we do not believe that there was any intent along that line. The faculty did not know previous to their meeting last week that the committee was going to report nor that any resolutions were going to be offered.

In its report the committee proposed that no organization, members of which are determined by participation in extra-curricular activities should be permitted on the Allegheny campus. The voting on the resolution took place at the same meeting, and, in our opinion, such radical changes of policy should be much more carefully considered.

Therefore, it is our opinion that the faculty should reconsider their action in what virtually amounts to the expulsion of Omicron Delta Kappa and Omicron Epsilon Delta. We urge that a faculty-student committee be appointed to consider the situation.

Again we state our position: We do not commit ourselves on the benefits and disadvantages of ODK and OED. That is a separate question. We are not arguing for or against the activities question. We do maintain that Omicron Delta Kappa and Omicron Epsilon Delta should be given a "square deal".—R. D.

State Language Test

Given Friday, March 20

Attention is called to the fact that no person is eligible to teach modern foreign language in New York State who has not received state approval for oral work in the language to be taught. The first step in securing such approval is the passing of a state written examination in the language in question.

All seniors who are interested in securing such approval should note that written examinations for approval of oral work in French, German, and Spanish will be held on Friday, March 20, 1936, at 1:15 p. m., in room 33 of Ruter Hall. Those desiring to take the examination must notify Miss Parker in Ruter Hall before February 25.

No other opportunity for taking the written examination will be offered until August 8, 1936, when summer school attendance is required of candidates participating.

DUKE UNIVERSITY SCHOOL OF MEDICINE

Durham, N. C.

Four terms of eleven weeks are given each year. These may be taken consecutively (graduation in three years) or three terms may be taken each year (graduation in four years). The entrance requirements are intelligence, character and at least two years of college work, including the subjects specified for Grade A Medical Schools. Catalogues and application forms may be obtained from the Dean.

Medical Honorary Post

Received By Dr. Strong

Word has been received here that L. C. Strong, '17, Ph.D., of Yale University School of Medicine, has been made a foreign corresponding member of "L'association française pour l'étude du Cancer."

Dr. Strong has been interested in cancer research ever since his graduation from Allegheny and has received considerable national fame.

GATORS LOSE FIVE MEN FROM SQUAD

Cop Win From Hobart But Bow Twice On Trip

Starting out on a three-day tour of New York state with a team practically decapitated as a result of eligibility rulings, Allegheny's basketball 'Gators pulled one win out of the three contests.

The games were the first played after the long layoff prior to exams.

Meeting three of the strongest exponents of the Empire state type of basketball, the Lawrencemen showed up well, with a patched up lineup, and snatched an unexpected, upset victory from Hobart, and battled a Hamilton five to the end, only to lose a tough encounter.

On the opening day of the three-day jaunt, the 'Gators met the exceptionally strong Alfred University quintet.

The Saxons have been setting a fast pace all year. In the habit of overwhelming all opponents, the Purple and Gold continued their winning way, by easily trouncing the Lawrencemen 51-23. At that the Alleghenians counted 12 more points than the strong University of Buffalo team, which went down before Alfred 58-11, the week before.

Faced with the first game since the exam period, Coach Lawrence had to do much juggling to find a new team. He used 10 men in all, trying to find a combination.

Alfred had a team of four veterans who have been playing together for four years. Their experience proved too much for the yearling 'Gators. Piling up a 9-0 lead before the Blue and Gold could garner a point, they held a 25-10 edge at the halfway mark. The second half was the same with the Saxons getting two points for every one the locals could tally. Sharter and Oberhanick tallied 30 points between them for Alfred. Ray Shafer, garnering 9, led the 'Gators.

The next night the 'Gators "hit on all cylinders" and pulled a surprise. Playing the same combination that last year defeated a much stronger Allegheny team, the 'Gators proved themselves "on", and topped the New Yorkers.

Overcoming a 12-9 disadvantage that existed at the end of the first half, the Allegheny cagers closed with a rush to administer a 31-19 defeat to the Hobart team.

The 'Gators were in rare good form as they polished off their attack in the second half, going ahead quickly at 14-13 and never thereafter being threatened. It was assuming something of the proportions of a run-away as the final whistle sounded.

Play through the first half was slow, Allegheny getting away to a 5-4 lead in the first 10 minutes but falling behind as Spies, veteran forward, caged a pair of quick goals. At the half Hobart was in possession of a 12-9 lead.

Nevins' field goal signaled the start of the second half, but Hoege was good on a foul point before McFarland's foul and Shafer's field goal sent the 'Gators ahead, 14-13. From this point the lead was widened steadily, jumping to 20-15, to 28-17 and thence to its final standing of 31-19.

Nevins, Shafer, and Hutchison, in that order, led the Allegheny attack. Each of them scored three field goals, but Nevins was good on four of five foul chances, while Shafer could produce but three of seven. Hutchison missed his lone scoring opportunity at the free-throw line.

Hobart was limited to five field goals, three in the first half and two in the later period. Spies accounted for 11 points through the medium of three field goals and five fouls.

The third successive opponent was met the following afternoon, at Hamilton, and tho' the 'Gators showed some of their form of the previous night, they lost out in the last minute rush of the Hamiltonians.

After tying the game up at several different times, the 'Gators inexperience showed up again and they lost out to the stronger team.

Inability to check one man, Carmer, opposing right guard, proved very costly. Garnering 16 points, through eight field goals, he gave his team the deciding edge.

The loss of Hutchison, who was injured in the Hobart game, greatly weakened the team. Coach Lawrence tried vainly to plug the gap, but no substitution could check the rampaging Carmer.

Two freshmen, Sedwick and Henry, broke into the game and showed promise, garnering five points each. Ray Shafer's defensive work was one of the highlights of the game. He held Sullivan, opponent ace forward, to nary a point. But Pugh, diminutive

cager who showed his flashy style to Alleghenians here last year, and Carmer made up for the deficit, scoring 28 points between them.

The trip proved of some consolation to Coach Lawrence in the finding of a starting five, and the knowledge that power is developing.

The trip brought the 'Gators' season record to two wins and six losses.

The box scores of the three games are listed below:

Outing Club Holds Sports Fest Saturday

Skiing, skating, and sledding engrossed the members of the Outing Club in a winter sports fest at Bouson Farm last Saturday afternoon.

The main event of the carnival was a hockey game in which the boys of the group participated. Gathered about a bonfire, club members sang ballads and enjoyed hot dogs, coffee, and apples. The group returned to the campus at 7:15.

Among the faculty members present were Miss Nancy Peffer, Coach Arthur Daniels, Dr. W. Scott Hall, Dr. Charles W. Ufford, and Dr. William P. Tolley.

A wood craft shop advertised in the University of California paper: "Fraternity paddles, any size, any shape."

Allegheny Swimmers Meet Defeat Before Oberlin Water Stars

Allegheny's swimmers, although they displayed better form than in the match with Case, were still not powerful enough to take over Oberlin last Saturday. They were defeated at Oberlin's pool by the score of 41-25.

The only first places garnered by the 'Gators were in the 100-yard free-style, won by Dick Jones, '39, and in the 200 yard relay with Jones, '39; Graft, '39; Thornton, '37; and Linn, '38, swimming.

Morrill, of Oberlin, covered the 200 yards in the free-style event in the best time that has ever been made in the Crane pool to set a new record of 2:30.6.

Three automobiles furnished the transportation for our swimmers to and from the meet.

The results in the different events follow:

200-yard relay—Allegheny (Jones, Graft, Thornton, Linn), Oberlin (Mannard, Durham, Fauver, Gould). Time—1:50.1.

150-yard breast stroke—Smith, Oberlin; Kelly, Oberlin; Swartz, Allegheny. Time—2:5.

100-yard back stroke—Fisher, Oberlin; Tucker, Oberlin; Jones, Allegheny. Time—1:13.6.

50-yard free style—Brown, Oberlin; Linn, Allegheny; Gould, Oberlin. Time—26.9.

100-yard free style—Jones, Allegheny; Morrill, Oberlin; Tucker, Oberlin. Time 1:39.9.

200-yard free style—Morrill, Oberlin; Manness, Allegheny; Robb, Allegheny. Time—2:30.6.

150-yard medley relay—Oberlin (Fisher, Belley, Durman), Allegheny (Johnson, Bruner, Watts). Time 1:39.1.

The next meet is Saturday at 2:30 at the home pool with Slippery Rock as the opponent.

Non-Frats, Sigs Lead First Two Rounds Of Basketball League

Action in the interfraternity basketball league will be resumed after a secession of activities for three weeks due to semesters exams. In the competition before the exams the Sigs and the Independents remained unscathed both winning two games against no losses. The high spots of the schedule have been the two games in which the BK's participated; the first game they lost to the Phi Gams 54-2; their second game they dropped to the Sigs 50-1. The Sig-Phi Psi game provided plenty of thrills with the Sigs finally winning in the closing minutes of the contest, 15-14.

The standing of the teams are as follows:

Non Frats	2	0
S. A. E.	2	0
A. X. P.	1	1
Phi Gams	1	1
Phi Delt	1	1
Phi Psi	1	1

Delts	0	2

New "Grill" On Campus Appears In Men's Lounge

Last Wednesday night a campus innovation in the form of a grill known as "Wimpy's" opened in the basement of Cochran Hall. "Wimpy's" is now open to the student public each day from one o'clock until midnight, under the proprietorship of J. Wellington Wimpy, otherwise known as Fred Lloyd.

At the present, until some arrangements can be made for someone to work in the mornings, the store will continue to open for the day at one o'clock. In the evening music and an open fireplace are featured attractions.

Wimpy's is at present privately maintained, but it is expected that upon Mr. Lloyd's graduation, four years hence, it will be taken over by the college.

German Club To Feature Motion Pictures

Motion pictures of present day Germany will feature the German Club meeting to be held on Tuesday evening, February 18. The meeting will start at 7:45 o'clock in Alden Hall.

Included in the film are numerous "still" pictures which were taken by Dr. Elisabeth Spann on trips which she has made to Germany during recent summers.

Dr. Spann will comment on the film.

Squad Hard Hit For Replacements By Losses

Championship Title In Ping Pong Won By Julian Ferguson

Julia Ferguson downed Betty Brooke in the finals of the ping pong tourney Saturday to claim the championship among Allegheny women.

The tournament, sponsored by the Women's Athletic Association, started in January, but due to the exam period, the matches were postponed until the second semester got under way.

Thirty women participated in actual playing matches. Several others entered but defaulted.

In the first round, Barbara Burns won from Helen Bennett; Edna McClure beat Kay Gardner; Julia Ferguson triumphed over Betty Rehtmyer; Betty Heath defeated Elizabeth Osborne; Virginia Cook downed Mariana Rall; Betty Matthews won from Virginia Maltby; Edith Green eliminated Ruth Witmer; Helen Allison conquered Helen Lusch; Romaine Lawrie was victorious over Valerie Fullerton; Elvira Peffer defeated Virginia Derr; Mary Vogan lost to Marjorie Sheasley; Betty Seibert beat Joan Large; Phyllis Freeland won from Emaruth Burkhardt; Evelyn Sleightholm eliminated Betty Mirer; Betty Biggs lost to Betty Brooke; several girls defaulted.

The second round resulted in victories for Edna McClure, Julia Ferguson, Virginia Cook, Edith Green, Romaine Lawrie, Betty Seibert, Phyllis Freeland, Evelyn Sleightholm, and Betty Brooke.

In semi-finals Julia Ferguson, Edith Green, Romaine Lawrie, Evelyn Sleightholm, and Betty Brooke were contestants. Romaine Lawrie beat Edith Green with a flashy attack, while Betty Brooke, in a steady, smooth game, won from Evelyn Sleightholm.

Box scores of the intramural games since the last issue of *The Campus* follow:

Since the beginning of the new semester Allegheny's basketball team was hard hit by the loss of five members of the squad.

Don Chester was forced to leave the squad because of outside work. Bob Petrequin and Bill Wilson dropped out of school, and Jack Watson and Jack Thompson are ineligible.

These losses sadly deplete Coach Lawrence's team, because this necessitates the rebuilding of the squad.

Jack McFarland and Keith Hutchison have been moved up to the first string, which now consists of Chet Pardee, Keith Hutchison, Ray Shafer, Jack McFarland, and Chuck Nevins.

Due to the shake-up Don Ervin, junior, Sidney Sedwick, freshman, and "Pinky" Henry, freshman, broke in the last three games.

THE SCRUBBING BRUSH

Well, I made it. I passed. And why not? My grades were the best money could buy.

At registration when those sitting on the chairs moved two seats instead of the usual one-half, the following was reported: I didn't know that there was anyone THAT big in school.

One of the note books handed in for Psych. I is reported to have been a six-timer worth \$1.50 and good for an A any time. It was very complete, having class notes on material which had not been taught for two years.

Combining the weather and the exams, this one came to my ears: A blizzard is in the middle of a chicken.

Several weeks ago the BK's tried to get funds for a new house, but the MFD arrived too soon. Protesting their innocence, the boys told the following story: Then the fire trucks (all of them came, it not being 224) stopped, the inmates rubbed on their windows and looked out and said: Wonder where they're going? The fire was put out before any damage was done by the vocal (I had to use a "c" instead of a "k" so it would look like a typographical error) fire dept.

A Science Surveyist (a frosh) spelled satellite so: saddle light. Is this an attempt to adapt the horse to the modern auto age?

The initials of Omicron Delta Kappa have a second meaning now. O D K.

Advice to the Lovelorn: It is better to have loved a short person than never to have loved at all.

TWENTY-ODD YEARS AGO.

Sheets and Pillows were roommates. And they decided to have a spread; So now I guess that I shall Put this column to bed.

This is a fact.

DR. LEE DIES

(Continued from page one)

sional baseball. This avid interest was reflected in the years he acted as chairman of the Committee of Athletics. For an interim, he served as manager of the college book-store.

An exceptionally skillful golfer, he was conceded to be the best player in the district.

Dr. Lee is survived by Kathleen Florence Carter Lee, of 625 Park Avenue, Meadville, his widow; Matthew Lee, of St. Petersburg, Fla., his father; George Lee, of Canfield, Ohio, his brother; and Mrs. George Smith, of St. Petersburg, his sister.

In opening the Friday memorial services Dr. C. F. Ross read the 90th Psalm and the 14th chapter of John. Dr. Henry Ward Church rendered several organ selections.

Replete with a simple dignity, Dr. Tolley delivered a "Tribute to Richard Edwin Lee." Of him he said:

"Professor Lee was in no sense an ordinary man. He had an extraordinary mind, extraordinary athletic skill, extraordinary gifts as a lecturer and teacher, and extraordinary charm and magnetism as a personality. Everything he did, he did superbly well. In the classroom and on the lecture platform he was a brilliant and inspiring teacher, in the research laboratory an ingenious, resourceful, and original thinker, and in his study, a keen, eager and persistent searcher after truth.

"While his life was bound up with study and research, he was not a cloistered scholar. His fine culture, impeccable courtesy and fastidious taste made him a social favorite both in the college and in the town, and his skill in golf and his enthusiasm for all athletics gave him another wide circle of friends among the lovers of sport in this part of the state. He had the kind of personality that won immediate respect and admiration. He knew how to meet people and talk with them and he was at home with all classes, rich and poor, schooled and unschooled, old and young. His friends were literally a cross-section of society.

"With competence in his field joined with so engaging and vital a personality, it was but natural that he should become known far beyond the limits of the college. Teachers' institutes and chautauqua circuits crowded his schedule with lectures; publishers welcomed his books, industrial plants like the Hookless Fastener Company, the National Bearing Metals Company, and the Venango Manufacturing Company sought out his services as consulting chemist, and the city engaged him as its bacteriologist. Universities like Illinois, Vanderbilt and Pittsburgh made attractive offers in an effort to lure him from his work here, but to the joy of all friends of Allegheny he elected to remain in Meadville.

"His life was always a busy one. He was an active member of the Meadville Rotary Club and the Masonic fraternity, served on the city planning commission and participated in a host of community activities. At the same time he carried heavy committee responsibilities at the college, was long the manager of the college book store, always taught large classes, carried forward much industrial research, contributed articles to scientific journals and, in addition, wrote five books.

"In recent years he poured out all his energy on his work at Allegheny and had little time for outside interests or recreation. With the introduction of the new curriculum some years ago he was charged with the preparation of a different type of introductory course in science. It was to be a course in which there was not only an integration of the different fields of science but also a union of science and philosophy, a philosophic approach to the study of science. This was a difficult assignment but it was one for which he was particularly well fitted. He plunged into the task with characteristic vigor and enthusiasm. Month after month he studied far into the night in painstaking preparation for his lectures. Month after month he denied himself needed rest to finish one more chapter of the book he was writing for the new course. Even when the first year's lectures had been given and the first edition of the text had been published he would not de-

sist from his labor. He kept up his study of source materials, perfecting his knowledge of new advances in science, continued his exploration of philosophy, and each year taught with greater artistry and skill.

"About a year ago he found his strength was waning and knew he was approaching physical and nervous exhaustion, but except for a short holiday he went on with his work, determined to carry on his classes and complete at any cost the revised edition of his book. Several important sections were written after he had already been stricken and was racked with fatigue and pain. Not until the last lecture of the semester had been delivered and the last line of his book had been written did he stop. More than anyone I know he exemplified the tradition of the stage that the play must go on and that an actor must not complain of pain until the curtain comes down at the close of the final act.

"Professor Lee will be remembered by scientists as the director of a highly original freshman course and the author of 'The Backgrounds and Foundations of Modern Science.' His last book was in many respects his crowning achievement.

"We shall remember him, however, not as a scientist but as a man. Students will speak of his shy, boyish smile, of his alert and brilliant mind, of his passion for intellectual honesty, of his demand for strict attention when he was lecturing, of his impulsive kindness and his fierce unwavering loyalty to all who came to be his friends. Children will remember the man who always stopped to talk with such deference and respect, and citizens in every walk of life will treasure the memory of their friendship with him.

"We shall remember him as one whose life was rich and many-sided. We shall think of him as one who found great joy in his work, great joy in his play, and great joy in his home. We shall remember especially his devotion to Mrs. Lee and their unbounded happiness together. The quiet serenity of their home and the idyllic quality of their affection for each other will not be forgotten.

"There was one side of Professor Lee's life that was not widely known, but which will be remembered by those who knew him best. It was the side of moral earnestness and quiet unpretentious faith. He made no parade of religious belief, little show of conventional religion. To live cleanly, to love honesty, to reverence truth, to struggle against vice and brutality and autocracy, to support every measure that would ease the burden of suffering and misery of the masses—these were the articles of his creed, the beliefs by which he lived.

"He did not often make public expression of his religious faith, but there are many graduates of Allegheny who remember the sincerity and impressive power of his chapel talks and prayers. They express so much of his philosophy of life and reveal so clearly the depth and vitality of his religious beliefs that I should like to quote briefly from one of them.

"The future stretches away before us with its doubt and uncertainty but we have faith. Our Father, that if Thou wilt gird up our loins and if we never bend before truth and justice and labor diligently for those things which make for the betterment of all humanity there shall be no need for fear.

"O Thou Giver and Sustainer of life, unveil the vision of men and women everywhere and grant them courage and strength that they may shirk from no duty or burden they ought to bear.

"For these tasks that await us only Thy strength can gird us and in the sorrow and the disappointments and discouragements that will probably come, the comfort which Thou alone can give will be able to sustain us.

"We beseech Thee, Our Father, that regardless of our confusion and perplexity we may be brought to see that there is something vital and significant in every one and that life means for each of us the transforming by earnest endeavor all this uncertainty into light and understanding to the end that we may fit our little fragment of life into the great plan of

creation and the glory of our Creator shall stand revealed.

"For everyone with such a life and such a faith as this there is surely a royal welcome to that larger timeless world where there is no suffering and no tears."

Concluding, Dr. Bruce S. Wright, of the Stone M. E. Church, pronounced the benediction. Colleagues with Dr. Lee in life, men formerly or now associated as professors and assistants in the department of chemistry acted as bearers. They were: Paul E. Hill, Dr. D. E. Thomas, George Johnston, Walter Fegley, Albert Ogilvie, Harley J. Morris, Carey March, and Martin Howes.

The entire faculty and administration, solemnly robed in cap and gown, constituted honorary bearers. Interment took place at Greendale Cemetery.

OFFICIAL ANNOUNCEMENTS

FRIDAY, FEBRUARY 14.

Basketball—Oberlin.
Associated Women Student's Tea.
Chapel—Allegheny Singers.

SATURDAY, FEBRUARY 15.

Swim—Slippery Rock.

MONDAY, FEBRUARY 17.

Chapel—Professor Benjamin.

TUESDAY, FEBRUARY 18.

Basketball—Grove City.

WEDNESDAY, FEBRUARY 19.

Chapel—Dr. Swartley.

Do you want to go skiing? 10c will rent a pair of skis for an afternoon. See Mr. Daniels at the Gym. The school has about 25 pair of seven foot skis and about 10 ski poles.

There will be an important meeting of the advertising staff of the Campus with Alex Weibold at four-thirty o'clock on Friday afternoon in Ruter Hall.

RADIO

TID-BITS

Our Interfraternity Ball seems to be up against it. The committee has been trying to secure a name band, but a shifting of dates caused a little trouble. It is reported that Art Kassel was willing to play, at a price within our range, on February 15. But the shifting of the date to March 5 stumped that. However, the committee is still after him.

Gene Beecher and Sammy Kaye are also under consideration. Any one of the three are smooth dispensers of music, and will be welcome features of the dance. Suggestions for the Ball Committee: One machine gun placed opposite the orchestra, to be used in case the music goes 'round and 'round—also in case a chaperone wakes up.

A news item states that in a Mid-Western penitentiary, each prisoner has a radio in his cell. Juliet Lowell, of "Dumb Belles Lettres" fame, expects that some of the tunes they request from bandmen are: "Warden You Know", "Grafters the Ball Is Over", "When My Gyp Comes In" and "Be Steal My Heart."

P. S. Miss Lowell is sure they're crazy about Richard Crooks.

Popular dance music in this country, declares Leo Reisman, the dynamic NBC conductor, is entering on its most sedate era since the days of the old-fashioned quadrilles, scottishes, and waltzes. Definitely gone, he says, are the wild rhythms and dance forms of the post-war days, and ballroom dancing generally will soon be so dignified even the reformers will be bored.

"The demise of the era of hotcha rhythms," says Reisman, "was prolonged a bit by the temporary stimulation of the 'Lindy Hop' and one or two other novel dances. But it was like injecting a shot of drug into a dying man—it only delayed its passing.

"Increasing indications now are that the end has come. One of them is the attitude toward the new dance, 'Truckin', which a few years ago would have swept the country, yet has been remarkably neglected by ballroom dancers since its introduction. Other strong indications are the changed dance tastes in colleges, where undergraduates are demanding quiet rhythms for quiet dancing. At Martha Berry College in Georgia students aren't even dancing fox trots because they are considered too wild. At Boston University the students have ac-

★ STARDUST ★

With examinations over, we can once more breathe with a sigh of relief and freedom. With the advent of a new semester, it is customary to make new resolutions. Star-Dust has decided not to be niggardly in this respect. Resolved—to dig deeper and wider. . . . The Allegheny natators at Oberlin held up the sailor's reputation. Mr. Farley is going to do a rushing business between Allegheny and Oberlin. . . . the faculty stand against O.D.K., one of the most cherished honors for an Allegheny man, has met with universal student disapproval. Many students are considering transferring to other schools where more recognition is given to those participating in outside activities. . . . The Phi Deltas had a barn dance at their rural estate. The song hit of the evening was "Down on the Farm". . . . The latest dope concerning why the Inter-Fraternity Ball is held up is because a prominent Main Street fraternity has a national convention. Two members may possibly attend the convention. . . . And then there was the Freshman who dragged down 4 C's and a D in semester finals. He wanted to know if he had a B average. . . . The new and interesting Wimpy A. C. seems to be the mecca for Allegheny's gastronomic connoisseurs. Can it be that we are facing another price war? . . . The leaving of the "Moose" has left an aching void in the heart of George and the rest of the Phi Gams. . . . The Sigs are trying to fill the shoes of the Oklahoma Hurricane up at Cochran. . . . More Pins!

. . . Belated congratulations to the Kappa with the Phi Gam pin, the Theta with the Phi Delt badge, and the Alpha Chi with the Delt pin. . . . In connection with pin hanging, a weird rumor whispers that a Kappa with a naval complex has succumbed to a Phi Gam's pleas. Personally, we don't believe it, but there it is. . . . The Michigan co-ed has some of Cochran's regular male habits walking on their heels. . . . We hear the Dean reminded the girls not to mistake the sorority guests for laundry women with evil intent. . . . We hear that hot dogs with fuzz are among the many dainty attractions at Bousson Farm skating parties. . . . We recently heard from one of the B.M.O.C.'s that the three causes of the many pin-hangings are the "bridge, moon, and damn foolishness". He further stated that (quote) "I wouldn't give my pin out for a million dollars. When I take a look at all the pins out now and some of the couples having them, it's enough for me; almost anyone can get one or give one out." . . . We hear that the proposed occupants of the delayed bus had quite a time while they were in Pittsburgh. The Stanley Theatre (featuring Earl Carroll's Sketch Book) was the greatest drawing card. . . . Overhead in the registration relief lineup several Mondays ago. . . . "I made that ten yard dash in four hours flat." . . . One chisler rushed up to the registration window. "Do singers get special preference here?" he asked. The clerk nodded affirmatively "Well," he gasped, "give me an audition."

Phi Delt Formal.

Phi Delta Theta held its annual mid-winter formal last Saturday evening, February 8, in the chapter house. Huck Finn and his orchestra from Pittsburgh furnished the music for the occasion. Professor Albert Ogilvie and Miss Mildred Ludwig were the chaperones. During intermission ice cream and cakes were served.

Mr. and Mrs. Joseph Harre, Mr. and Mrs. Fred Haberman, Mr. and Mrs. John Bozic, Mr. and Mrs. Clifford Lewis, Mr. William Hershelman, and Mr. Tony Smith were the guests.

Alpha Chi Rho announces the pledging of Charles Cares, '39, of Cleveland, Ohio; Gordon Barrett, '39, of Meadville, and Kenneth Johnson, '39, of Syracuse, N. Y., on February 8, 1936.

Ohio State Officials

Answer Dr. Tolley's Comment

Modern youth can "take it."

At least that's the verdict of prominent Ohio State officials who were asked to comment on published statements of Dr. William P. Tolley, president of Allegheny College, to the effect that young people "Can't take it because they have never been trained to do it."

The colleges and universities are full of students who are proving their ability to weather tough going, the Ohio State educators said. They cited examples: "a boy who works from six to midnight every night in an out-of-town industrial plant; a student with no income whatever, entirely dependent on a board-and-room job (there are lots of these, and they don't all have jobs for both board and room) and student members of police and fire departments.

tually organized to eliminate cheek-to-cheek and 'streamline' dancing from their affairs."

"These symptoms reveal that dignity and decorum are again taking over American dances, and hotcha and hi-de-ho are out."

Jack Denny was in a music publisher's office the other day seeking new tunes when they showed him a novelty number that immediately struck his fancy. "That's swell," said Denny, "who wrote it?"

"Why, don't you know?" they informed him. "Barry DeVine wrote it." Barry DeVine is the vocalist in Denny's orchestra.

A X P Radio Party.

Alpha Chi Rho held a radio party last Saturday evening. Dr. and Mrs. Long were the chaperones for the affair. There were about 30 couples present. Among the guests were Robert Thompson, Jack Fleming, Thomas Knorr, William Cutler, and Gordon Barrett.

Phi Gamma Delta.

On Saturday evening, Feb. 8, Phi Gamma Delta held a radio party. There were about 24 couples present. Mr. John Hulbert was the chaperone for the affair. Cocoa and wafers were served as refreshments.

Classical Club Reads Work Or Aristophanes

Members of the Classical Club met last evening in the Classical Room of the Library at 7 o'clock. The principal feature of the meeting was the reading of an abridged translation of "Birds" by Aristophanes.

This play is a fantasy telling how two old citizens of Athens, weary of life in their city during the great war with Sparta, founded a new city. This new domicile was named Cloud Cucuberry. It is situated up in the air in the kingdom of the birds and brought both Gods and Man to terms.

The abridged version, while reducing the length by more than one-half keeps all the essentials of the plot and an example of each typical part in the construction of a Greek comedy. Members of the club participated in the reading of the play.

Prize Essay Contest Announced This Week

Announcement has been made of the annual Homer Prize Essay contest to be held this year under the supervision of the Department of English. An award of twenty-five dollars will be made at commencement for the best undergraduate essay presented before April 3 to a member of the English Department.

The undergraduate may select a subject of his own choice and treat it in a formal or informal essay of not less than one thousand words. The only restriction upon the subject will be that the student must confirm himself to matter in which he is actively and personally interested.

There will be three judges, members of the Allegheny faculty, two of whom will be members of the Department of English.
