My Dear Mr Britt: -

I have been taking account
of engagements, obligations
etc and have concluded that
if you are willing to risk me
I am willing - glad indeed -
to undertake the experiment
at Knox & while we talked
last week in New York. I
am too - too confident - of
doing much for you but
I will do my best and

2 enjoy a drink.

The material of which I
told you - that ~~concerns~~ the
~~material~~ ~~concerns~~ the
~~business~~ ~~labor~~ ~~and~~ ~~dealing~~ ~~with~~ - the
industrial, marine, labor
changes which acceptance
of and experimental - will
the principle of construction
kept about will I am
convinced offer the best
basis for the ^{daily} conference
I can say it is varied
pertinent to ^{and} the present

business situation and can be
subject come to the experience of
my student.

As for the girls - I should want
them to take the lead in sub-
ject or rather if possible not
I shall be pained with subject -
person - plenty of material on
the drop of contemporaries.

~~Your kind & advise,~~

If you have notions of what
can & cannot be used please
pass them on - I'll fit 'em -

The same rule you set up
a non minus and as they
under may shall effect - to
change adapt as you may
think wise - - -

Is this satisfactory?

Please believe I feel specially
honored that you and Miss
Phillips should think me fit for
such an undertaking

Very sincerely yours
Lillian Parker
