

August 23, 1920

My dear Mr. Weik:

Thank you very much for the trouble you took in writing me so fully in answer to my inquiry. It gives me just what I wanted to know. I used a facsimile reproduction of one page in my own work, the page on which is written "Abraham Lincoln his book" and I remember the page devoted to land and dry measure in your book. I did not know but that you might have something different and that I could have a photograph made. However, these two serve my purpose very well.

I am interested in what you say of Mr. Moores. I have not in many a day found anyone who seemed to me so intelligent and so sympathetic in Lincoln matters. It was a wonderful treat to talk with him.

Thank you for your good offer of aid in my life for the Boy Scouts. I shall be coming to you, I am sure. I will see that the Magazine is sent you as it comes out, and I shall be glad of your criticisms. It will go later into book form.

Thanking you again for your letter, believe me

Very sincerely yours,

Mr. Jesse W. Weik,
