Dear Miss Tarbell:

May I ask your advice about a problem that may interest you, namely about some discoveries I have made?

I have discovered the cause and cure of cancer, also all the so-called degenerative diseases. I am mailing you a crude little booklet I got up the last I could as no-one would publish it for me. Everything in the booklet is true and a doctor Sweetser of the University of Calyornia has just proved it by (low oyygen tension) curing cancer in rats by keeping them in tank under low atmospheric pressure. The "low oyygen tension" does not kill the rats but cured 83 per cent of the rats subjected to it and afflicted with cancer.

Mr Arthur Brisbane in his column Today said "If diminished oyygen tension kills cancer perhaps increased tension would cure it." May fourteenth in the Hearst papers.

Besides this discovery I have also discovered the first principles of fire, Electricity, oyygen, ether, the substance of which the sun is composed etc.

I desire very much to know, is it possible to have someone help me in editing this book, publishing it and putting it on sale for everyone to have the opportunity to read it. Thanking you I am

Very Respectfully
Helen McDonald
1249 Pine St. Apt 15 San Francisco Calif
