December 7, 1939

Dear Miss Rowley:

Thank you for the Sandburg.
I'll return it a little later. Why doesn't
Dr. Schultz ask Sandburg to ship him any of
his extras that he has no place for.

I am enclosing a photograph of
the model Bob has made of Lincoln's one invention.
If you examine the photograph in "Abraham Lincoln
Inventor" Page 12 you will see he has done a good
job. As I think I wrote you he had specifications
from the Smithsonian Institute.

I have told him that you would
take care of the model until the room is ready
if he wanted to deliver it this Fall. The
weather would probably be too bad in February
for him to come up, or would it? I think he
will be writing you.

Faithfully yours

Ida M. Tarbell
