My dear Miss Tarbell:

In the spirit of the 1934 Mobilization for Human Needs, may I present to you the enclosed data in regard to the work for problem children and mothers in need of assistance in emotional adjustment?

Because an exceptionally fine private home has been offered at this time for a Psychological Resting Home for Mothers and problem children, "Our Children" is very anxious to avail itself of this opportunity. Therefore we are sending out a strong appeal for aid, as in order to take advantage of this offer we need to be assured of operating funds for a certain period. As you read of this movement we feel sure that you will see the value of such a work.

May we ask your assistance in any way you feel able to give. Aside from financial aid, we desire to have such openings as possible to present this movement to groups of women or organization who would be interested in spreading the work. Dr. Elmore, a woman of culture and charm, is also an able speaker, and stands ready to meet and address those whose hearts go out to a work of this nature. Should you find it possible to suggest ways and means by which she may contact those interested, we would greatly appreciate such help from you.

Trusting that you will find it possible to afford me a favorable reply, I remain

Cordially and sincerely yours

David Cole

Director
