

Jane Adams.

She is house-keeper - does it -
goes about picking up - planning
ordering - arranging! is definitely
the head of the house - the mother
the mistress - the keeper. And wonderfully
effective & charming in all these
relations. I am amazed at the
way she looks after me. In-
conspicuously - maternally - thinking of
my comfort & wants.

Prof. Thurman says of her. She has
always had more sense than
anybody else in my company she
meets with.

She is looking ill & I wonder the
reason that - she is losing ambition
or interest - It is the melted affair
of the anarchist - & the cruel
insincerity of the press
John R. Welch's paper said she
was (before suspended) she is
portending the springs of civilization!
