

October 25, 1935

Dear Lena Kannen:

The lamp is here and is the chief beauty spot in this crowded study of mine. I shall have to re-organize my whole place to live up to it. And such an excellent light. I am having its life history written out to show to friends. It came through perfectly.

It was dear of you to send it to me. Nothing gives me greater satisfaction to have something of yours and Georges in this room where I spend most of my days.

Did you get the jade ornament. It was sent and registered for \$75.00, the early part of this month. I have had no acknowledgement. Please let me know at once.

I hope you are having a lovely fall. I hear people complaining that it has not been so brilliant but all I have seen of it has been radiant.

Love to you.
